Volume 21 Number 1 January 1999

iii From the Editor
Robert Allen

Papers

1 Assessment of bed temperature monitoring for detecting body movement during sleep: comparison with simultaneous video image recording and actigraphy
T. Tamura, S. Miyasako, M. Ogawa, T. Togawa, T. Fujimoto

9 The method of linear transformation in revealing EEG polyharmonic components in comparison to the Fourier analysis
R. Draganova

15 Using simulated noise to define optimal QT intervals for computer analysis of ambulatory ECG
P. E. Tikkanen, L. C. Sellin, H. O. Kinnunen, H. V. Huikuri

27 Regularization of blood motion fields by modified Navier–Stokes equations
A. Tura, A. Sarti, T. Gaens, C. Lamberti

Technical notes

37 Electrocardiogram signal preprocessing for automatic detection of QRS boundaries
I. K. Daskalov, I. I. Christov

45 An integrated system for the production of field shaping devices in radiotherapy
K. Gueorguieva, J. Bliznakov, Z. Kolitsi, D. Kardamakis, N. Pallikarakis

53 Investigation of unsteady flow in a model of a ventricular assist device by numerical modelling, comparison with experiment
C. S. König, C. Clark, M. R. Mokhtarzadeh-Dehghan

Volume 21 Number 2 March 1999

Papers

65 A mathematical stiffness matrix for characterising mechanical performance of the Orthofix DAF
T. N. Gardner and M. Weemaes

73 Computer evaluation of left ventricular wall motion by means of shape-based tracking and symbolic description
M. Baroni

87 A practical gait analysis system using gyroscopes
K. Tong and M. H. Granat

95 Strain rate effect on the mechanical behavior of the anterior cruciate ligament–bone complex
D. P. Pioletti, L. R. Rakotomanana and P.-F. Leyvraz

101 Three-dimensional localisation based on projectional and tomographic image correlation: an application for digital tomosynthesis
G. Messaris, Z. Kolitsi, C. Badea and N. Pallikarakis

Technical note

111 Three-dimensional computational reconstruction of mixed anatomical tissues following histological preparation
S. J. Ferguson, J. T. Bryant and K. Ito

1350-4533/99/$19.00 © 1999 IPEM. Published by Elsevier Science Ltd. All rights reserved.

Communication

119 Laboratory analysis of superelastic NiTi compression springs
R. Schneevoigt, A. Haase, V. L. Eckardt, W. Harzer and C. Bourauel

127 **Authors' response**
M. E. Valentinuzzi

129 **Announcements**

Volume 21 Number 3 April 1999

131 **Announcement from the Editor**

Papers

133 A steady flow analysis on the stented and non-stented sidewall aneurysm models
S. C. M. Yu and J. B. Zhao

143 Effects of local skull inhomogeneities on EEG source estimation
J. O. Ollikainen, M. Vauhkonen, P. A. Karjalainen and J. P. Kaipio

155 Pulse wave attenuation measurement by linear and nonlinear methods in nonlinearly elastic tubes
C. D. Bertram, F. Pythoud, N. Stergiopulos and J.-J. Meister

167 Biorthogonal wavelet transforms for ECG parameters estimation
N. Sivannarayana and D. C. Reddy

175 Viscoelasticity modulates resonance in the terminal aortic circulation
R. Burattini, S. Natalucci and K. B. Campbell

187 Computational fluid dynamic simulations of cavopulmonary connections with an extracardiac lateral conduit
F. Migliavacca, M. R. de Leval, G. Dubini, R. Pietrabissa and R. Fumero

195 Procedure for the semi-automatic detection of gastro-oesophageal reflux patterns in intraluminal impedance measurements in infants
M. Trachterna, T. G. Wenzl, J. Silny, G. Rau and G. Heimann

203 **Letter to the Editor**
J. C. Barbenel

205 **Announcement**

Volume 21 Number 4 May 1999

Papers

207 Flow in carotid bifurcations: effect of the superior thyroid artery
S. Z. Zhao, X. Y. Xu, M. W. Collins, A. V. Stanton, A. D. Hughes and S. A. Thom

215 Measurement of airborne ultrasonic slow waves in calcaneal cancellous bone
R. Strelitzki, V. Paech and P. H. F. Nicholson

225 Real time monitoring of muscular fatigue from dynamic surface myoelectric signals using a complex covariance approach
S. Conforto and T. D'Alessio

235 Inter- and intra-individual variability of ground reaction forces during sit-to-stand with principal component analysis
G. Borzelli, A. Cappizzo and E. Papa

241 Fluorescent strip-lights as a source of error in tissue reflectance spectroscopy
D. S. Bain and M. W. Ferguson-Pell

247 Normalisation of EMG amplitude: an evaluation and comparison of old and new methods
A. Burden and R. Bartlett

Technical Notes

259 Measurement of posture by triangulation using potentiometers
C.-H Yu and N. de N. Donaldson
265 A new system for the measurement of displacements of the human body with widespread applications in human movement studies
P. J. Rowe, J. Crosbie, V. Fowler, B. Durward and G. Baer

Report Review

277 Fundamental quantities and units for ionizing radiation — ICRU report 60
C. Edwards

Volume 21 Number 5 June 1999

Papers

279 Analysis of strain distribution in the medial collateral ligament using a photoelastic coating method
T. Kawada, T. Abe, K. Yamamoto, S. Hirokawa, T. Soejima, N. Tanaka and A. Inoue
293 A new method of assessing the mechanical properties of patient support systems (PSS) using a phantom. A preliminary communication
D. S. Bain, J. T. Scales and G. P. Nicholson
303 A hybrid approach to EMG pattern analysis for classification of arm movements using statistical and fuzzy techniques
S. Micera, A. M. Sabatini, P. Dario and B. Rossi
313 Classification of tetraplegics through automatic movement evaluation
R. Maksimovic and M. Popovic
329 Automatic synthesis of synergies for control of reaching — hierarchical clustering
M. Jovović, S. Jonić and D. Popović
343 Toward a portable blood pressure recorder device equipped with an accelerometer
S. Charbonnier, J. P. Siché and J. M. Mallion
353 Modelling evaluation of the testing condition influence on the maximum stress induced in a hip prosthesis during ISO 7206 fatigue testing
M. T. Raimondi and R. Pietrabissa
361 A study of heart rate and heart rate variability in human subjects exposed to occupational levels of 50 Hz circularly polarised magnetic fields
M. L. Sait, A. W. Wood and H. A. Sadafi

Technical note

371 Multiple lead recordings improve accuracy of bio-impedance plethysmographic technique
P. K. Kauppinen, J. A. K. Hyttinen, T. Kööbi and J. Malmivuo

Volume 21 Number 6/7 July/September 1999

SPECIAL ISSUE
Intelligent Data in Electromyography and Electroneurology

GUEST EDITORS
C.S. Pattichis, I. Schofield, R. Merletti, P.A. Parker and L.T. Middleton

Papers

377 Editorial
R. Allen, C.S. Pattichis, I. Schofield, R. Merletti, P.A. Parker and L.T. Middleton
379 Introduction to this Special Issue: Intelligent data analysis in electromyography and electroneurography
C.S. Pattichis, I. Schofield, R. Merletti, P.A. Parker and L.T. Middleton
389 Decomposition and quantitative analysis of clinical electromyographic signals
D.W. Stashuk

405 Autoregressive and cepstral analyses of motor unit action potentials
C.S. Pattichis and A.G. Elia
421 Global and detailed features of motor unit potential in myogenic and neurogenic disorders
E. Zalewska and I. Hausmanowa-Petrusewicz
431 Classification of the myoelectric signal using time-frequency based representations
K. Englehart, B. Hudgins, P.A. Parker and M. Stevenson
439 Detection of hidden rhythms in surface EMG signals with a non-linear time-series tool
G. Filligoi and F. Felici
449 Objective motor response onset detection in surface myoelectric signals
G. Staude and W. Wolf
469 Quadriceps muscles activation in anterior knee pain during isokinetic exercise
M. Cesarelli, P. Bifulco and M. Bracale
479 Effect of electrode dimensions on motor unit potentials
N.A. Dimitrova, G.V. Dimitrov and V.N. Chihman
487 Compensation of the effect of sub-cutaneous tissue layers on surface EMG: a simulation study
D. Farino and A. Rainoldo
499 Bispectral de-noising of the compound action potential for estimation of the nerve conduction velocity distribution
F.A. Papadopoulou and S.M. Panas
507 The effect of stimulus current pulse width on nerve fiber size recruitment patterns
R.B. Szlavik and H. de Bruin
517 The EMG diagnosis — an interpretation based on partial information
M. Suojanen, S. Andreassen and K.G. Olesen

Volume 21 Number 8 October 1999

Papers

525 A pharmacokinetic model for multiple sites discontinuous gastrointestinal absorption
Y. Plusquellec, C. Efthymiopoulos, P. Duthil and G. Houin
533 Two methods for the measurement of voluntary contraction torque in the biceps brachii muscle
D. Farina, R. Merletti, A. Rainoldi, M. Buonocore and R. Casale
541 Ultrasound velocity and attenuation in relation to maximum trabecula stress in the patella
S.-M. Han
547 Effect of aneurysmectomy on left ventricular shape and function: case studies
Y. F. Petrank, H. Azhari, J. Lessick, S. Sideman and R. Beyar
555 Analysis of volition latency on antisaccadic eye movements
Y.-F. Chen, T. Chen and T.-T. Tsai
563 A 16-channel SQUID-device for biomagnetic investigations of small objects
H. Nowak, F. Gießler, R. Huonker, J. Haueisen, J. Röther and M. Eiselt

Technical notes

569 The incidence of radio-frequency impulsive noise within hospital buildings: initial measurements in the 450 MHz band
A.I. Riemann and N.E. Evans
575 Variation of the spatial position computed by Roentgen Stereophotogrammetric Analysis (RSA) under non-standard conditions
R. Soavi, M. Motta and A. Visani
583 Calculation of extracellular potentials produced by an inclined muscle fibre at a rectangular plate electrode
N.A. Dimitrova, A.G. Dimitrov and G.V. Dimitrov
589 Dimensional change in muscle as a control signal for powered upper limb prostheses: a pilot study
L.P.J. Kenney, I. Lisitsa, P. Bowker, G.H. Heath and D. Howard

Book review

599 Micromanipulation by light in biology and medicine, the laser microbeam and optical tweezers; K.O. Greulich
P. Vadgama

Volume 21 Number 9 November 1999

Papers

601 Signal separation of background EEG and spike by using morphological filter
S. Nishida, M. Nakamura, A. Ikeda and H. Shibasaki
609 Optimal control of FES-assisted standing up in paraplegia using genetic algorithms
R. Davoodi and B.J. Andrews
619 A new sensor for monitoring chest wall motion during high-frequency oscillatory ventilation
C. Davis, A. Mazzolini, J. Mills and P. Dargaville
625 A three-dimensional kinematic model of the human long finger and the muscles that actuate it
J. Biggs and K. Horch
641 Mechanical characterization in shear of human femoral cancellous bone: torsion and shear tests
K.B. Garnier, R. Dumas, C. Rumelhart and M.E. Arlot

Technical notes

651 An in vitro investigation of the dependence on sample thickness of the speed of sound along the specimen
C.F. Njeh, D. Hans, C. Wu, E. Kantorovich, M. Sister, T. Fuerst and H.K. Genant
661 An instrument for the multiparameter assessment of speech
P. Sharp, S. Kelly, A. Main and G. Manley

Volume 21 Number 10 December 1999

Papers

673 A morphological analysis of the macro motor unit potential
C. S. Pattichis, I. S. Schofield and P. Fawcett
681 Physiological variability of peak latency in evoked potentials: use of a property of asynchronous averaging
S. Nishida, M. Nakamura and H. Shibasaki
689 Finite element modeling of the cervical spine: role of intervertebral disc under axial and eccentric loads
S. Kumaresan, N. Yoganandan, F. A. Pintar and D. J. Maiman
701 A method for determining the heat transfer and water vapour permeability of patient support systems
G. P. Nicholson, J. T. Scales, R. P. Clark and M. L. de Calcina-Goff
713 Classification of normal and pathological tremors using a multidimensional electromagnetic system
J. M. Spyers-Ashby, M. J. Stokes, P. G. Bain and S. J. Roberts

Technical notes

725 An inexpensive sensor for measuring surface geometry
J. R. Starck, G. Murray, P. V. Lawford and D. R. Hose
731 Filtering of electromyogram artifacts from the electrocardiogram
I. I. Christov and I. K. Daskalov

739 Volume 21 Contents
745 Author Index
749 Keyword Index
